# Health Data
# Application Guidelines and Fee Schedules

**Data Linkage**

If data being applied requires linkage with national registries or government files, the application and its research proposal must first receive approvals from MJ Health Research Foundation and the government agency issuing the national data. Once all the approvals are in place, MJ Health Research Foundation will provide all the necessary data to the data-issuing agency to perform data linkage. A special data management fee of USD $350.00 should be made payable to the MJ Health Research Foundation.
